

JGloss

Please read before using:

1. What files do I need ?

- jcloze6.ht_ (Output 6)
- jcloze6.js_

Create a new folder (e.g. **JGloss/**) and extract the zip file into it.

2. How do I create *JGloss* - pages ?

- Open JCloze and input all your data as usually. Each word or expression which should get an annotation becomes a **gap**; the annotation must be entered as a **clue**.
- There's also the possibility to add a reading text additionally.

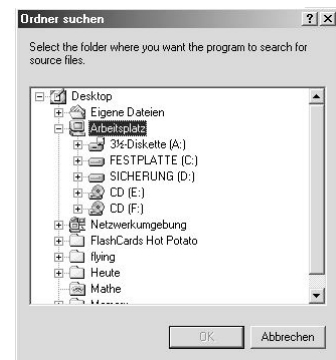

3. How do I create my HTML-page ?

- Press the **Shift + Control + ALT + S** keys **simultaneously**.

You should see the window on the right:

Choose the folder where the source file is located.
Press the OK-key or Return-key.

- Now create your web-exercise: **F6** for Output 6
- That's it !!!

4. What should I do after creating my exercise ?

- Press the **Shift + Control + ALT + T** keys **simultaneously**.
- Why ?
Next time the JCloze-programme is loaded, it tries to find all the needed files within the subfolder of the modified source-files – but without success; you would get an error message.

If you do forget it and get an error message when you open the programme, **don't** be worried about it: just confirm the error message(s) by pressing the OK button – after that the programme will be opened and you can create your exercises as usually; the Hot Potatoes programme has searched for and then loaded all the original source files which are delivered by Martin Holmes and Stewart Arneil.
